## ABS-T™ Air Brake System Treatment

- Dissolves Ice on Contact.
- Keeps Air Lines Free of Ice down to -40°F.
- Designed for use in Alcohol Evaporator Systems.
- Contains Corrosion Inhibitors and Lubricity Agents to Protect System Components.
- Formulation Meets Specifications of the Truck Maintenance Council.

### Description

**ABS-T™** Air Brake System Treatment is an air-line antifreeze that keeps air brake systems free of ice to provide trouble-free, cold-weather operation.

### Directions

*For more information please consult the Material Safety Data Sheet for this product.*

**ABS-T™**, Air Brake System Treatment is formulated to be introduced into an air brake system through an alcohol evaporator or alcohol injector. These devices are designed to properly atomize and regulate the amount of antifreeze in the system, which minimizes the potential for air system malfunction.

1. Pour contents into alcohol evaporator until jar is approximately two-thirds full. When the air compressor is in operation, bubbles should be seen passing through the **ABS-T™**, Air Brake System Treatment. Check all connections.

**Do Not Pour the Air Brake System Antifreeze into Trailer or Dolly Glad-Hands.**

**Keep This Product Out Of Reach of Children.**
